

Macmillan Education Teacher Training Days 2014

**"A life of learning:
building up your
students' life skills."**

In collaborazione con:

Giovedì 13 Marzo, ore 15.00 - 18.30

I.T.G. "G. Quarenghi" - Via Europa, 27 - Bergamo

- **Apertura lavori**
Noemi Ciceroni. CRTDrills Bergamo.
- **Computing is a Life Skill**
Damien Lonsdale. We are all familiar with the 4Cs in language learning: creativity, collaboration, critical thinking and communication skills. How about including a fifth 'C' for computing? This session aims at showing how students can learn English by taking advantage of the latest digital offerings, such as the Online Workbook.
- **Exploring Life Skills**
Steve Taylore-Knowles. This session will answer all questions about life skills. What are life skills? Why are they important? How do we bring them into our classrooms? Using concrete examples, I'll explain how you can not only teach your students English, but help them to use their English to become more effective in their professional, academic and social lives.
- **Competences: some integrated solutions to a seemingly complex area**
Jonathan Coxall. We have been using the word *competences* in recent years to denote quite a number of general and language learning skills. It is a term that is used at both a formal and an informal level. This talk focuses on where we are in terms of competences and how we can easily integrate them into our language teaching.

Sessioni di aggiornamento pedagogico per i docenti della scuola secondaria con rilascio di un certificato di esonero ministeriale riconosciuto.
